

Building Footprints Data Dictionary 2015

Field Name	Description
STRUCT_ID	Structure ID assigned to each building/structure. A shared podium will have a different structure ID to its connected tower.
GEOM_TYPE	Geometry type
OVLHGT_AHD	The height (AHD) of the tallest part of the structure. This may include artefacts such as antennas, lift overruns and cranes.
BASE_AHD	The average ground level height (AHD) of the structure.
SUBURB	Suburb where the footprint is situated.
